## IBM CLOUD ASSIGNMENT - III

1. Create a Bucket in IBM object storage.

The screenshot shows the 'Custom bucket' creation page in the IBM Cloud console. The 'Unique bucket name' field contains 'ibmcloudbucket1409'. A 'Bucket naming rules' box lists requirements: uniqueness across the system, no personal information, alphanumeric start/end, and allowed characters (lowercase, numbers, dots, hyphens). Under 'Resiliency', 'Regional' (Best performance) is selected over 'Cross Region' (Highest availability) and 'Single Site' (Data sovereignty). The 'Location' is set to 'us-south' and the 'Storage class' is 'Standard'. A blue 'Create' button is at the bottom right.

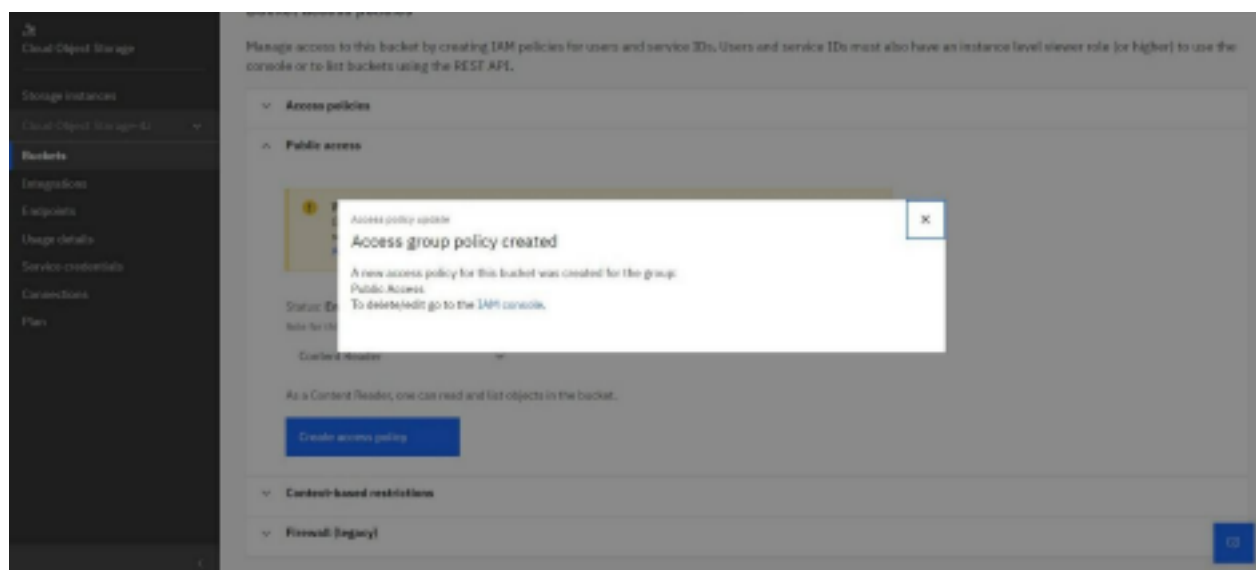

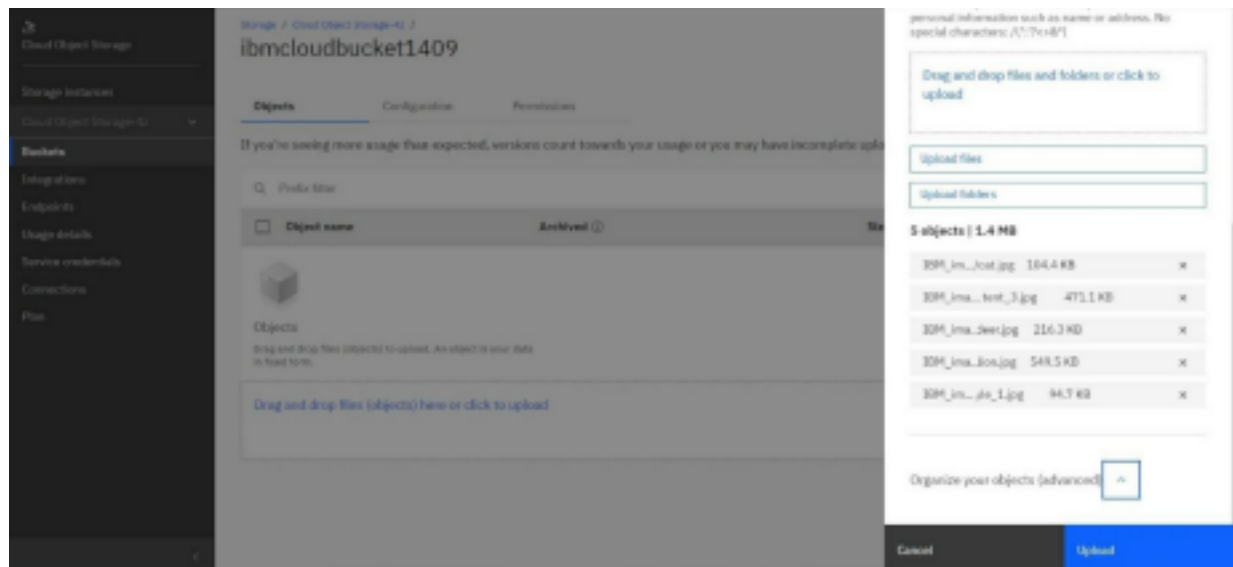

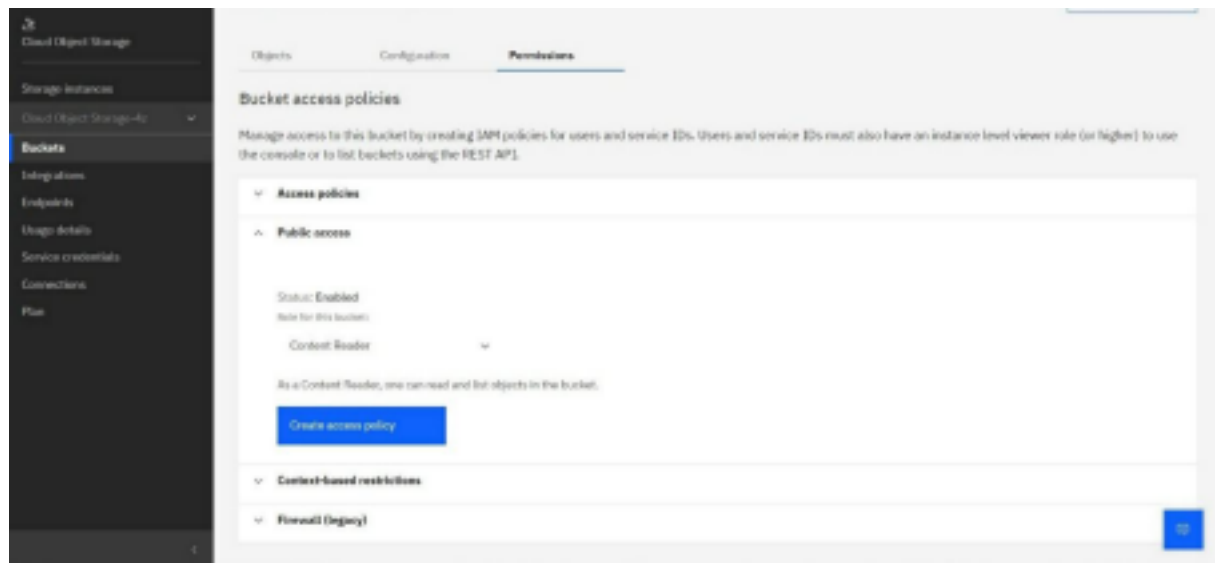

2. Upload 5 images to ibm object storage and make it public. Write html

code to display all the 5 images.

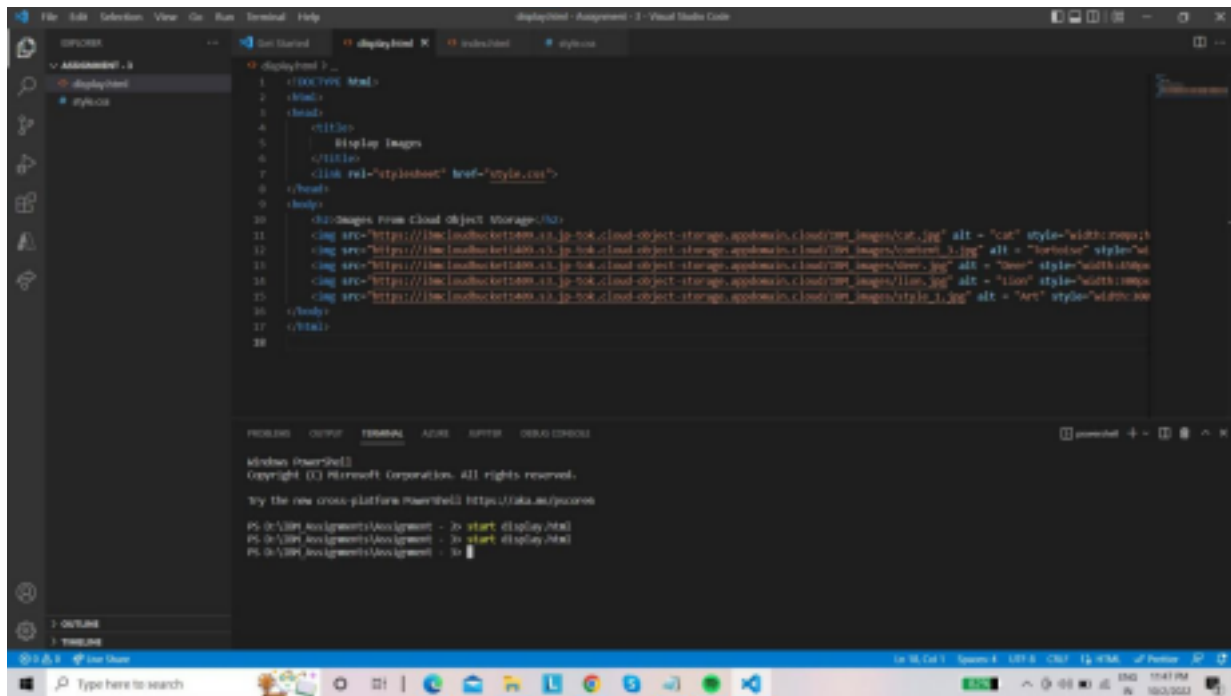

## Code File : display.html
